

SUGARBITE

Oliver Seeds

DESIGNED TO EXPLOIT THE POTENTIAL OF THE BEST HIGH SUGAR VARIETIES

A blend of intermediate and late Perennial Ryegrasses with White Clover

Suited to both cutting and grazing systems

- Combines 'high sugar' types from both IBER and DLF breeding, creating a mixture with better winter hardiness, disease resistance and intake than competitors.
- Very high yields of silage at first and second cut.
- Excellent grazing performance, using only varieties selected from Oliver Seeds grazing trials with high intake characteristics.

Yield potential 17.5 tDM/ha in the first year

Sowing Rate 13 to 16 kg/acre

Pack Size 20kg
