

# TYPHOON

Oliver Seeds

## A DEDICATED MIX SPECIFICALLY FORMULATED FOR OVERSEEDING

Large seeded, aggressive species are essential for overseeding to succeed.

Oliver Seeds have a range of mixtures suitable to cover all situations but TYPHOON is a dedicated mix specifically formulated for maximum effect:

Ideal for surface or slot seeding, the components involved are primarily Hybrid and Tetraploid Ryegrasses to facilitate rapid establishment and accelerated growth.

- Dedicated mix for specific purpose
- Cost effective and productive

There is great interest in using specific mixtures to overseed pasture in order to boost production. This avoids the cost of conventional cultivation and re-seeding and is an excellent solution where shallow soils or stony conditions prevent traditional sowing. Oliver Seeds publish guidelines on several methods available for your use; copies of these guidelines are available on request.

Sowing Rate 7 to 10kg/acre

Pack Size 20kg
